

Enabling payment of 50% of the electricity bill value

Initiative Owner

Ministry of Energy

Initiative Objective

Support private sector regarding electrical service

Initiative Description

Allowing subscribers in the industrial and commercial sectors optionally to pay 50% of the value of the monthly electricity bill for the months (April, May, and June) , provided that the remaining dues are collected in divided installments over six months starting from January 2021 with the possibility of postponing the payment period if required .

How to benefit from the Initiative

- Enterprises in commercial and industrial sectors can partially pay through electronic bank channels no less than 50% of electricity bill recorded in the system (commercial and industrial sectors)
- Service provider shall automatically divide unpaid amounts into six months payments, starting from January 2021, except in case of issuance of a royal order to extend or delay payment period.
